Task: CLAM Maintenance & Support

ID: T142

Author: Maarten van Gompel

What exists: CLAM has been around since 2011 and is in active use

What must be adapted / extended / created anew: This task merely reserves maintenance and support for users/service provicers, ensures bugs are fixed and requested features are implemented; provides the necessary continuity.

Why important for CLARIAH (scientific impact): CLAM is used by many NLP webservices in and beyond of CLARIN/CLARIAH

Targeted/Actual users: Developers, service providers

Actual use (quantify!): Usage of the CLAM webservices hosted in Nijmegen can be tracked in our statistical report, does not include stats on any CLAM services hosted by other parties (and there are various)

Social Impact (concrete examples): -

Lead: Maarten van Gompel

Proposed PM estimation (try to justify): 2PM, spread over the entire duration of CLARIAH-PLUS. Considering the current maturity of CLAM we don't expect this to take too much time.

Proposed Participants + PMs Maarten van Gompel, 2PM

Allocated PMs: 3PM

Deliverables

- Software: CLAM
- Documentation
